

Easter Word Problem

Thanksgiving Worksheet

Solve each problem. Show your work!

Mom had a bowl of Easter treats in a bowl on the kitchen counter. On Easter Sunday, some treats were missing.

$\frac{1}{8}$ of the chocolates went missing on Friday and a furth $\frac{1}{8}$ went missing on Saturday. What fraction of the treats were still in the bowl?

Solve each problem. Show your work!

Mom had a bowl of Easter treats in a bowl on the kitchen counter. On Easter Sunday, some treats were missing.

$\frac{1}{8}$ of the chocolates went missing on Friday and a furth $\frac{1}{8}$ went missing on Saturday. What fraction of the treats were still in the bowl?

My Picture

My Equation

$$1 - \frac{1}{8} - \frac{1}{8} = \frac{6}{8}$$

$$\frac{6}{8} = \frac{3}{4}$$

My Answer

$\frac{3}{4}$ of the
treats are left
on Sunday.
