

Multiplication circle drills (2-12)

Multiplication Practice Worksheet

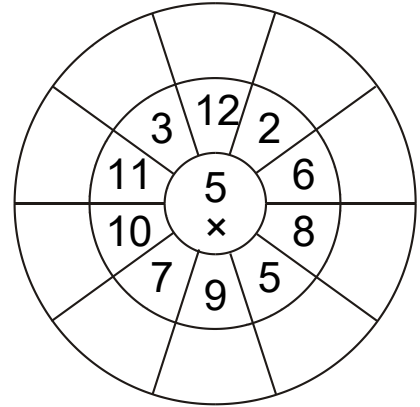

Multiply.

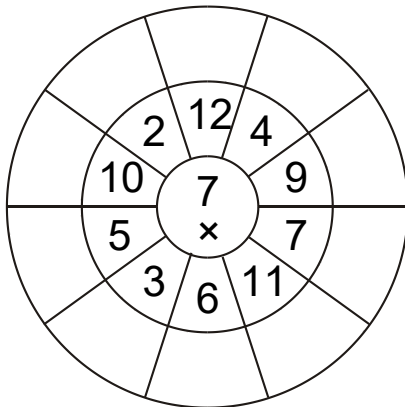

A circular multiplication drill with a central circle containing $4 \times$. The inner ring contains the numbers 3, 7, 5, 2, 6, 8, 4, 10, 11, 12. The outer ring is empty for the student to write the products.

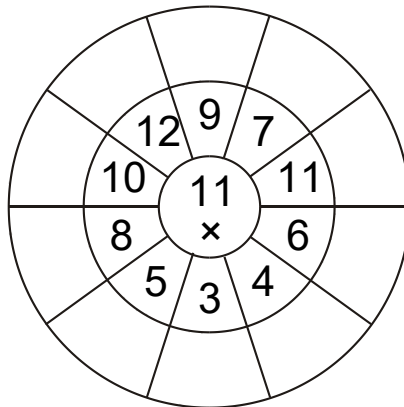

A circular multiplication drill with a central circle containing $3 \times$. The inner ring contains the numbers 12, 3, 10, 5, 4, 6, 7, 2, 11, 9. The outer ring is empty for the student to write the products.

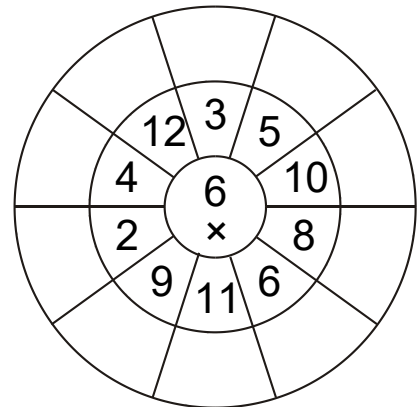

A circular multiplication drill with a central circle containing $5 \times$. The inner ring contains the numbers 3, 12, 2, 6, 8, 5, 9, 7, 10, 11. The outer ring is empty for the student to write the products.

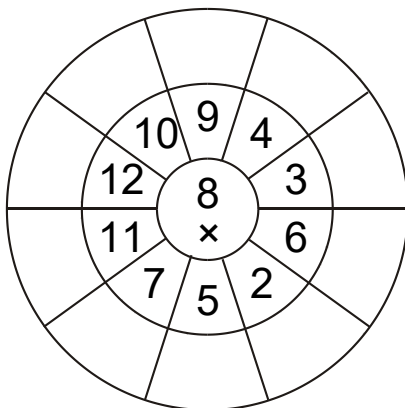

A circular multiplication drill with a central circle containing $7 \times$. The inner ring contains the numbers 2, 12, 4, 9, 7, 11, 6, 3, 5, 10. The outer ring is empty for the student to write the products.

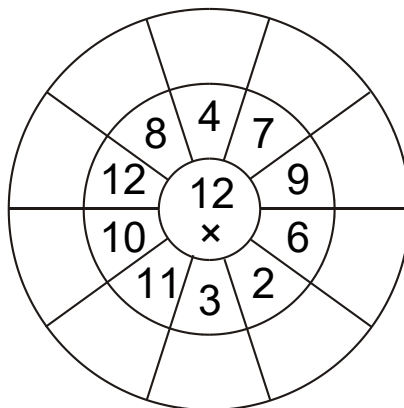

A circular multiplication drill with a central circle containing $11 \times$. The inner ring contains the numbers 12, 9, 7, 11, 6, 4, 3, 5, 8, 10. The outer ring is empty for the student to write the products.

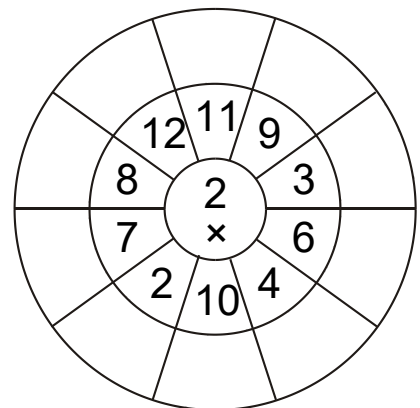

A circular multiplication drill with a central circle containing $6 \times$. The inner ring contains the numbers 12, 3, 5, 10, 8, 6, 11, 9, 2, 4. The outer ring is empty for the student to write the products.

A circular multiplication drill with a central circle containing $8 \times$. The inner ring contains the numbers 10, 9, 4, 3, 6, 2, 5, 7, 11, 12. The outer ring is empty for the student to write the products.

A circular multiplication drill with a central circle containing $12 \times$. The inner ring contains the numbers 8, 4, 7, 9, 6, 2, 3, 11, 10, 12. The outer ring is empty for the student to write the products.

A circular multiplication drill with a central circle containing $2 \times$. The inner ring contains the numbers 12, 11, 9, 3, 6, 4, 10, 2, 7, 8. The outer ring is empty for the student to write the products.
