### Grade 1 Word Problems Worksheet

There is a flower shop at downtown which is having a sale on roses. In the display, there are 10 white roses, 8 pink roses and 7 red roses.

1. What fraction of the roses are pink?
  
  
  
  
  
  
  
  
  
  
2. How many roses are there in total?
  
  
  
  
  
  
  
  
  
  
3. The stem of a rose is 18 cm long. If the florist cuts 6 cm off of the stem, how long is the stem?

4. A white rose is 60 cents and a pink rose is 75 cents. A red rose is 90 cents. Abby wants to buy a rose for her mother. She has 3 nickels and 2 quarters. Which rose can she afford to buy?
  
  
  
  
  
  
  
  
  
  
5. When the shop closes, there are 2 white roses left. How many white roses were sold?
  
  
  
  
  
  
  
  
  
  
6. The shop opens at 10 in the morning and closes at 7 in the evening. How many hours does it open for in a day?

## Answers

1.  $\frac{8}{25}$  of the roses are pink.
2.  $10 + 8 + 7 = 25$   
There are 25 roses in total.
3.  $18 - 6 = 12$   
The stem is 12 cm long.
4.  $25 + 25 + 5 + 5 + 5 = 65$   
Abby has 65 cents.  
She can afford to buy a white rose.
5.  $10 - 2 = 8$   
8 white roses are sold.
6. 9 hours
