

Describing 3D shapes

Grade 2 Geometry Worksheet

- 1) Place a **red X** on each shape that has a <u>curved surface</u>.
- 2) Place a **blue X** on each shape that has exactly <u>8 vertices/corners</u>.
- 3) Place a green X on each shape that has exactly 1 vertex/corner.
- 4) Place an **orange X** on each shape that has <u>5 vertices/corners</u>.
- 5) Place a red circle around each shape that has exactly 2 flat faces.
- 6) Place a blue circle around each shape that has exactly 1 flat face.
- 7) Place a green circle around each shape that has exactly 6 faces.
- 8) Place an orange circle around each shape that has exactly 5 faces.

Answers

- 1) Place a **red X** on each shape that has a <u>curved surface</u>.
- 2) Place a blue X on each shape that has exactly 8 vertices/corners.
- 3) Place a green X on each shape that has exactly 1 vertex/corner.
- 4) Place an orange X on each shape that has <u>5 vertices/corners</u>.
- 5) Place a red circle around each shape that has exactly 2 flat faces.
- 6) Place a blue circle around each shape that has exactly 1 flat face.
- 7) Place a green circle around each shape that has exactly 6 faces.
- 8) Place an orange circle around each shape that has exactly 5 faces.
