Addition (sums 50 or less)

Morgan's family went to an ocean park on a family trip.

1. Morgan has 2 brothers and 3 sisters. How many siblings does he have?

2. In the sea lion show, there were 4 sea lions performing in one pool and 9 sea lions swimming in the other pool. How many sea lions were there in all?

3. The vendor in the park sold 14 packs of corn chips, 21 packs of potato chips and 25 cans of soda. How many packs of snacks did the vendor sell?

4.   Trails were one of the tourist attractions at the ocean park. Visitors lined up in lines to enter the trails. There were 20 visitors in the first line and 22 visitors in the second line. How many visitors were there lining up for the trails?

5.   The family visited the oceanarium. They saw 12 big saltwater fish and 15 big freshwater fish. How many big fish did they see altogether?

6.   Morgan's family spent 32 minutes strolling through the oceanarium, and they spent another 11 minutes observing the fish and taking pictures. How many minutes altogether did the family spend in the oceanarium?

7.   Write the addition equation for this sentence: There were 2 big ponds in the park. Each pond had 18 koi fish. There were 36 koi fish in the ponds."

Answers

1. 2 + 3= 5
    Morgan has 5 siblings.

2. 4 + 9 = 13
    There were 13 sea lions.

3. 14 + 21 = 35
    There were 35 cans sold.

4. 20 + 22 = 42
    There were 42 visitors lining up for the trails.

5. 12 + 15 = 27
    They saw 27 big fish in the oceanarium.

6. 32 + 11 = 43
    The family spent 43 minutes in the oceanarium.

7. 18 + 18 = 36
